

❧ ENVIRONMENTAL POLICY ❧

Whilst we endeavour to provide a luxurious experience we are continually looking for ways to improve our RESPONSIBLE TOURISM performance. We welcome suggestions and ideas from our guests to help us achieve this objective, and we sincerely thank you for considering the environment:

- We conserve water and power whenever possible
- Our appliances are modern and energy efficient
- We use 'on demand' gas water heating
- We recycle and compost whatever we can
- We use environmentally friendly products in the rooms
- We source locally produced goods

HOW YOU CAN HELP

Conserve Water & Power

- If only a few dishes, wash by hand rather than using the dishwasher, or leave them on the bench and we will wash these as part of the daily room service
- Re-use towels and other linen unless dirty
- Turn off oven, microwave, television, towel-rail, electric blanket and appliances when not in use. Stand By mode will reduce power usage

Recycle & Compost

- Leave food scraps to the side so we can compost or give to the chooks
- Place glass, plastic, and cans in recycle bin, or leave on the bench for room service
